THE CHARITY HOSPITAL

OF LOUISIANA,

WAS FOUNDED IN THE YEAR 1786

BY

DON ANDRES ALMONASTER Y ROXAS,

To whose generous endowment, the munificence of the

LEGISLATURE OF THIS STATE,

and the liberality of the State of Pennsylvania, the community is indebted
for the means of erecting this edifice, built in the year

1832.

His Excellency A. B. Roman, being Governor and Ex-Officio President
of the Institution.

To record which and inscribe hereon the names and contributions of
its distinguished benefactors,

THIS TABLET HAS BEEN ERECTED.

ANNUAL REPORT
OF THE
BOARD OF ADMINISTRATORS OF THE CHARITY HOSPITAL
For the Year Ending December 31st, 1905.

CHARITY HOSPITAL,
STATE OF LOUISIANA,
NEW ORLEANS, February 4, 1906.

To His Excellency, N. C. Blanchard, Governor of the State of Louisiana, and Ex-officio President of the Charity Hospital Board of Administrators:

Your Excellency—In obedience to custom and as required by law, the Chairman of the Board of Administrators takes pleasure in presenting for your consideration a digest of the various reports of committees and officers, giving a concise statement of Hospital affairs during the year 1905. For further details you are respectfully referred to the reports which accompany this communication.

A wise economy has been practiced in the application of funds, and nothing left undone commensurate with available means for the better care of its inmates. In the report of the Finance Committee it will be seen that our receipts for the year 1905 were \$157,095.46, and expenditures \$146,948.75, leaving a surplus of \$9,266.19. As compared with 1904, the revenues for 1905 show an increase of \$15,917.25. This is accounted for by larger returns in excess of the preceding year of \$6,600.00 from auction sales, \$5,000.00 from licenses and \$1,500.00 from slaughterhouse fees, making a total of \$13,100.00. In donations and legacies, \$4,565.00 were received, and there is deposited in special fund \$56,519.30.

For this increase in the revenues the Chairman of the Board deems it his duty as well as pleasure to assign to Mr. L. E. Valloft, the earnest and energetic Chairman of the House Committee,

the credit for such investigation and action, with the cordial support of his colleagues, as has contributed to the result. Nor should we ignore his honor, Mayor Behrman, without whose aid we would have been very much hampered in the collection of all dues for licenses issued. The appointment of a young attorney, Mr. W. S. Lewis, will insure the collection of all Hospital dues entitled by law.

During the year 1905 there were treated indoor 9,074, including 662 remaining on the 1st of January, 1905. Of the 8,412 admitted during the year 5,268 were white and 3,144 colored. Of the whites admitted 3,481 were adults and 306 boys. The adult females, white, numbered 1,292, and girls, 55. Of the colored adult males, 2,053, females, 946, boys, 90, and girls, 55. In the Outdoor Clinic for Men and Boys, 10,310 were treated, and 34,236 consultations given. In the Clinic for Women and Girls, 9,119 were treated and given 34,222 consultations. The total number treated in the two Clinics amounted to 19,429, and consultations to 68,458. The total number of deaths amounted to 1,191, of which 651 were white and 540 colored. The total death rate was 13.1-10, and the net, 8.4-10, deducting the deaths occurring within 24 to 48 hours. The obstetrical cases numbered 263, of which 143 were white. The ambulance calls numbered 1,844 and the accident cases 5,669. The surgical operations performed numbered 1,611. The Registrar reports a tabulated record of 925 cases. The Pathological Department and Pasteur Institute, under the able management of Dr. Pothier, has rendered valuable service in its aid to diagnosis and in the treatment of the unfortunate exposed to rabies. Valuable specimens are also prepared and preserved. He reports 12,776 examinations of specimens and 118 treated for supposed rabies infection. In the report of the House Committee, which attends to material wants and supervises the economy of this institution, so ably managed by Sister Agnes and her corps of Sisters, the following improvements are cited:

The establishment of an electric call system within reach of each bed, which insures prompt attention to patients; the addition of two surgical dressing rooms with up-to-date fittings, and the renovation of various departments.

Under the direction of the Medical Committee with the House Surgeon, an electro therapeutic service has been established. The present method of recording cases will soon be changed for a more elaborate and modern system, whereby the valuable material furnished by this institution will be preserved and made useful and available to the medical profession.

It is contemplated in the near future to revise the rules and regulations governing every department of the Hospital to meet modern requirements of hospital management.

The Milliken Hospital for Children, that important adjunct to this great charity, in the means it offers for the relief of afflicted children but confirms the foresight of the philanthropic donor in the creation of this department, so needed and so long desired. The work in the Milliken Hospital is fully covered in the report of the House Surgeon.

The Training School for Nurses in charge of the Directress, Sister Agnes, and of the Superintendent, Sister Dolores, provides the sick with qualified nurses, and an opportunity to young women to become useful and self-supporting. There are at present in training 52 young ladies, and on December 12th there were graduated 25. It is the desire of the Board to increase the corps of nurses. Naturally the prevalence of yellow fever during the summer exercised a deterring influence on many who would otherwise have applied. Now that this fear has been removed, we hope the number required will be readily obtained.

During the year a number of the inmates, Sisters, students, nurses and patients, were stricken with typhoid fever, which was traced to milk infection. Much praise is due the House Surgeon for the investigation made and to Dr. Couret in the absence of Dr. Pothier, for locating the source of the infection.

The thanks of the Board are extended to all of the officers of this Hospital for the able and faithful discharge of their respective duties, which meets with full appreciation and commendation.

To Sister Agnes and the corps of Sisters, for their excellent management, devotion to duty and motherly care of the inmates of this Hospital.

To our attorneys, Messrs. Farrar, Jonas & Kruttschnitt, whose great services in all legal matters are gratuitously and cheerfully given.

To the Visiting Surgical and Medical Staff.

To the Resident Students for their courteous and gentlemanly bearing, their zeal in the discharge of duties and their appreciation of the advantages offered in perfecting their medical education.

To the Nurses in training for their earnest efforts to fit themselves for their noble calling; for their faithful observance of rules and regulations and for their tender care of the sick entrusted to their charge.

To the Ambulance Corps and to all the employees of the Hospital.

In conclusion, permit me, my colleagues, to express my deep sense of appreciation for the uniform courtesy shown me, and for your friendly regard. I have borne the honor as your Chairman and you, the burden of responsibility and labor.

E. S. LEWIS, M. D.,

VICE-PRESIDENT C. H. BOARD.

Annual Report of the House Committee.

CHARITY HOSPITAL,
STATE OF LOUISIANA,
NEW ORLEANS, February 1, 1906.

To the Vice-President and Board of Administrators, New Orleans Charity Hospital,
New Orleans, Louisiana:

Gentlemen—Your House Committee have the honor to report that in the matter of improvements during the past year, the A. B. Miles' Surgical Amphitheatre and auxiliary operating rooms have been elaborately repainted and in furnishings practically renewed, comparing favorably with any in the United States.

The Clerk's office has been entirely remodeled and repainted and is now well arranged for the business of the Clerk.

The Treasurer's office and Directors' room have been renewed and oil paintings cleaned.

In the main buildings, electric bell signal service has been installed, a service button being attached to each bed, communicating to the Trained Nurses and Watches the immediate wants of the patients. With the valuable assistance of your Medical Committee the service has been completed with most satisfactory results.

Fire apparatus throughout the Hospital has been much improved by the purchase of one hundred new extinguishers, additional hose and the placing of one dozen stretchers on each floor to carry out mattress and patients in the event of fire. The Corps has been drilled under Chief Ponder every quarter.

and inspected by Chief Engineer O'Connor, of the Fire Department, and City Engineer, Mr. Hardee.

Porcelain lined bath tubs and lavatories have been increased throughout the buildings, both in white and colored wards.

The asphalt pavement in front of the Hospital Cemetery, on Canal Street, was completed during the year at a cost of \$1,500.00, and fences dividing the Cemeteries destroyed by fire renewed.

In the matter of Ambulance Service everything possible has been done to expedite the prompt and immediate response to calls for the ambulances. All old horses have been disposed of, and at present, as far as stock is concerned, in A1 shape, with four fine teams for day and night service.

With the assistance of the local Fire Department the trip system has been installed and horses trained to respond to the tap of the gong.

The promptness of the Students has done much to lessen delays, and we take occasion to thank their principal, Dr. Batchelor, for this assistance in the cause.

In the matter of supplies and general operating expense we have prepared a table or compilation, showing the daily expense per patient to the institution. It follows:

SUSTENANCE	TOTALS	Daily Average Patients	Daily Cost per Patient
Meat.....	\$11,097 31		
Bread.....	5,295 07		
Milk.....	7,132 71

	4,086 35	643½	.0170
	\$146,948 75		.6260, a

The cost per patient per day, is as above proven, figure that will compare with that of any institution of a similar character in these United States.

In addition to the daily patients' average of 643 2-4, we housed and fed daily

Sisters.....	37	Total, 263
Nurses.....	60	
Salaried Employees.....	112	
Students.....	18	
Unpaid Help.....	26	

who participated in the item of sustenance.

ST. JOHN'S HOSPITAL, BIRMINGHAM, ENGL. - LABORATORY.

If we consider that the daily average of people in the institution as 896 3-4, 643 2-4 patients and 253 Sisters, nurses, paid, unpaid help and students, the per capita cost is exactly 45 cents per day.

As to general repairs and improvements needed, we recommend an additional story be added to the Male and Female Clinics, to be used as dormitories for male and female help, respectively. A large percentage of our help now sleep in wards; an addition to the laundry; a new power plant to be built upon a more central point to allow for additional machinery; new boilers, present ones being in use for ten years; enlarging of openings in rear of main building to conform with opening in front, all of which we will take up and submit fully in our regular monthly reports following.

As usual, we recommend the exceptional able services of Chief Engineer Ponder, whose duties are constant, given at all times, day or night when necessary.

We also commend the kind services of Dr. Vincent Ranna, Veterinary Surgeon, who has taken care of the horses without charge to the institution.

Respectfully submitted,

LOUIS ED. VALLOFT, CHAIRMAN,
JNO. T. GIBBONS,
WM. G. VINCENT.

Annual Report of the Finance Committee.

CHARITY HOSPITAL,
STATE OF LOUISIANA,
NEW ORLEANS, February 1, 1906.

To the Vice President and Board of Administrators:

Gentlemen—Your Finance Committee respectfully report that the accompanying statement, prepared by the Treasurer, has been duly examined by the special Committee appointed for that purpose, and found to be correct. This statement gives a history in detail of all the receipts and disbursements during the year 1905. It shows the total receipts of \$157,095.46 for 1905, as against \$141,178.21 for 1904, an increase of \$15,917.25. It also shows the total disbursements for 1905 to be \$146,948.75, as against \$136,398.04 for 1904, or an increase of \$10,550.71. At the close of the year there was a balance in the General Fund of \$9,266.19, as against a balance of \$12,939.24 at a corresponding period in 1904.

The items of disbursements show no marked increase over similar items in 1904, except insurance, which shows an increase of \$1,466.95. The following items of cash receipts show increases during the past year:

Auctioneers' Returns.....	\$6,602 24
Licenses	5,005 00
Slaughter House Fees.....	1,512 68
Rent of Batture Property.....	3,192 24

There was a decrease in the gate receipts, amounting to \$725.95.

The sum of \$13,804.76 was transferred from the General Fund to the Special Fund, leaving to the credit of the Special

Fund at the end of the year, \$56,519.30, as against \$41,808.00 at the same time in 1904.

As mentioned in previous reports, this fund is created by donations and legacies, and is used for the purpose of erecting new buildings and making permanent improvements. It is from time to time added to by benevolent friends of the institution. A list of the contributors to the Special Fund forms a part of the Treasurer's Report. The donations and legacies for 1905 were \$4,565.91, as against \$4,250.18 for 1904.

Respectfully submitted,

HUNTER C. LEAKE,
ROBERT E. CRAIG,
G. A. WIEGAND,

Finance Committee.

Annual Report of the House Surgeon.

CHARITY HOSPITAL,
STATE OF LOUISIANA,
NEW ORLEANS, February 5, 1906. }

To the Board of Administrators of the Charity Hospital:

Gentlemen—I have the honor to report in detail upon the Medical affairs of this Hospital and to transmit the official records for 1905.

In analyzing the results of a year's work and presenting these to a Governing Board, the first question that fastens itself with insistent pertinacity upon the mind is, "what have we accomplished?" This question arose and confronted me, and I am pleased to answer to you, we have made great progress.

In administering the medical affairs of the institution we have, in the past year, encountered many serious difficulties and have worked under the most trying circumstances. The outbreak of typhoid fever in the month of June resulted in the disorganization of our Resident Staff and seriously impaired the efficiency of our nursing force.

From this calamity we emerged with the loss of two nurses; all others stricken with the disease happily recovered. Coincident with this yellow fever made its appearance in this community, necessitating the withdrawal of the majority of the Visiting Staff from the service of this institution to devote their energies to the public service in combatting the disease. Thus during four months the work of the institution, increased by the number of yellow fever cases admitted, was performed by the Resident Staff, with the assistance of the few members of the Visiting Staff, who continued in the performance of their hospital duties.

I wish here to specially acknowledge and commend the zeal and faithfulness displayed by the corps of Resident Students, who were at all times willing to assume the extra duties placed upon them.

Summarizing the work of the year we find there were 8,412 patients admitted: White, 5,268; colored, 3,144. White, male, 3,481; female, 1,292; colored, male, 2,053; colored, female, 946; children, 640 (white 495, colored 144). On January 1st, 1905, there remained in the Hospital 662 patients. Adding to this, the number admitted during the year, there were in all 9,074 treated in the wards. The daily average of inmates was 643. There were 1,191 deaths; 7,206 were discharged, and 677 remained on December 31.

The gross mortality was 13 1-10 per cent. and the actual mortality 8 4-10, the latter being slightly less than that of the previous year.

The Coroner viewed 222 bodies; 425 patients died within 36 hours after admission.

In the Outdoor Clinics there was 19,429 new patients, to whom 68,458 consultations were given. Compared with the previous year there was a decrease of 1,326 patients.

The Ambulance Service has been maintained at the highest grade of efficiency. The work of this department has increased to an extent which necessitated the equipping of a third ambulance to meet extra demands. During the past year there were 1,844 calls, an increase of 28 calls over any preceding year.

The large number of accident and emergency cases treated in the Surgical Amphitheatre is worthy of your attention. The greatest number before treated in any year has been 5,206 cases; in the past year there were 5,699, and 1,611 major operations were performed.

In the Obstetrical Wards, 263 women were delivered, with but one fatality from Septicæmia, and a mortality from all causes of 3 4-10 per cent.

The Department of Pathology and Bacteriology to which an additional Resident Student was assigned as Special Assistant, has discharged the work sent to it in a manner satisfactory to all.

The Hospital Dispensary has been operated with a strict regard to economy without in any way sacrificing purity of drugs to cost. The cost of operating for the year was \$4,652.50 against \$4,638.79 for last year, a very slight and easily accounted for increase. All drugs and pharmaceutical products used have been purchased from the most reliable drug firms and were of the highest grade. Our Chemist, Mr. Jos. Walker, has proved his ability to fill the position.

The number of clinical histories selected as worthy of preservation was 925, classified as follows: Medical, 467; Surgical, 354; Gynecological, 104.

Concerning the Training School for Nurses, special reports have been addressed the Medical Committee. The number of nurses in the school was and is much too few for the needs of the institution. The efficient nursing of so great a number of patients requires at the minimum 75 nurses.

At the Pasteur Clinic, 198 patients applied for the preventive treatment of rabies; 118 were received and 80 turned away, with the assuring advice that no danger threatened. The far-reaching benevolence of this Clinic was extended to 50 patients coming from five other States.

The increase in the number of white children admitted to the Milliken Memorial Hospital will necessitate the opening of another ward for the accommodation of the surplus, which was 100 above the record.

During the prevalence of yellow fever the Hospital continued to exercise its proper function to the State, and maintained the attitude assumed in every former epidemic. No case of yellow fever was referred elsewhere for treatment, but all applicants were received and many convalescents transferred from the Emergency Hospital were taken in at the request of

that institution. Our experience in the sanitary handling of this disease has confirmed in every respect, the soundness of the dogma of the mosquito being the sole transitory agent in propagating yellow fever. One hundred and one cases were treated in this Hospital and the only precaution against the spread of the infection to the other inmates, nurses, students and Sisters of Charity was the use of mosquito bars and the screening of all wards in which fever cases were treated. Not a single person among the eight or nine hundred on the grounds of the Hospital became infected. Such has not been the experience of former years in which the agent of transmission was not known and screening not practiced.

The improvements of the year were many, all in accord with the most advanced ideas of sanitation and therapeutics and have placed this Hospital in the foremost ranks of institutions for the treatment of the sick.

The Surgical Amphitheatre has been completely renovated and furnished with up-to-date appliances of every description. The new Surgeons' Preparatory room will serve as a model for others to copy.

The X-Ray room has been altered and every instrument of precision used in radiography has been procured and added to the equipment of that department. The work done with the new apparatus is most satisfactory and is placed under the special direction of one of the Visiting Staff.

The equipping of the Electro-Therapeutic room is nearing completion. No greater addition to the Therapeutic possibilities of the Hospital has been attempted in many years.

Electric call bells have been installed throughout the main building. The system contributes very materially to the comforts of the sick and permits of quick response to bed calls, especially so during the hours of the night.

This year has witnessed the consummation of a desire long expressed by the Medical Staff. I refer to the system of filing

X RAY ROOM.

and indexing valuable clinical data. This system, adopted with the approval of the Medical Committee, is that originated and operated at the Bellevue Hospital of New York.

The importance of the improvement is manifested by the unanimous approval and pleasure expressed by the medical profession of this city.

Lastly, I would call your attention to the fact that we are sterilizing our own catgut, which will result in a saving of several hundreds of dollars annually. Up to the present it has been the custom to purchase all catgut ready prepared.

In all the improvements attempted and brought about I have had the cordial assistance of Sister Agnes and the devoted band of Sisters of Charity under her, and to her and them, I return my thanks and appreciation. The domestic affairs of the Hospital have been administered with that wisdom and charity characteristic of the Sister Superior upon whom the responsibility is placed.

I wish to express my appreciation of the valuable services rendered the Hospital by the Visiting Staff.

My assistants, Drs. J. A. Danna and S. W. Stafford, have ably assisted me in discharging the responsibilities of the executive office.

Messrs. Jas. R. Leak, Clerk, and Jno. Ponder, Engineer, have, in their respective fields, performed every duty with dispatch and thoroughness.

To complete this report I wish to express my thanks and obligations to the House and Medical Committees for their unflinching encouragement, support and sympathy in the projects undertaken and brought to successful issue.

Respectfully submitted,

J. M. BATCHELOR,
HOUSE SURGEON.

Pathological Department.

CHARITY HOSPITAL,
STATE OF LOUISIANA, }
NEW ORLEANS, January 30, 1906.

To the Board of Administrators of the Charity Hospital:

Gentlemen—I have the honor to submit the following annual report of work done in the Pathological Department and the Pasteur Institute for 1905:

Specimens of urine examined.....	7,949
Specimens of blood examined.....	3,021
Specimens of sputum examined.....	769
Specimens of feces examined.....	288
Specimens of cultures examined	139
Specimens of tissues examined.....	133
Specimens of pus examined.....	67
Specimens of fluids examined.....	23
Specimens of secretions examined.....	6
Specimens of bile examined.....	1
Specimens of stomach contents examined	31
Specimens of discharge examined	11
Specimens of bone examined.....	1
Autopsies held	151
Photographs taken.....	173

12,776

Enclosed is a table giving the monthly and annual report in one.

In the Pasteur Institute we had 198 patients that applied for treatment; of these we

Dismissed without treatment.....	80
Treated	118
	<hr/>
	198

Of the 118 treated there were:

Discharged	94
Deserted	23
Died.....	1
	<hr/>
	118
White males.....	68
White females.....	25
Colored males	17
Colored females.....	8
	<hr/>
	118
Class A	34
Class B	32
Class C	52
	<hr/>
	118

The residence of these patients are as follows:

From City.....	25
From Louisiana....	43
From Mississippi	44
From Alabama	2
From Indian Territory.....	2
From Texas	1
From Arkansas.....	1
	<hr/>
	118

As is seen from the above report of Pasteur Institute the majority of cases are in Class C. That is the unknown class, or

doubtful cases. This occurs because the animals inflicting the injury are killed, and that laboratory investigations cannot be made, in the great majority of cases, as the organs reach us in a decomposed condition, and also on account of the uncertain results of such examinations.

I wish to call the attention of your honorable body to the fact that, though the department for the past few months has had the service of a typewriter, yet this service is not adequate to the requirements of the department. It would be urgent that the department have a stenographer and typewriter who could take autopsy notes to translate them, also notes on pathological specimens for future reference. With the method of indexing and cataloguing our autopsies it becomes necessary to do a great deal of clerical work which takes up considerable time that could be given to pathologic work, and in that way cripples the efficiency of the department.

For the last six months all of our autopsies and tissues and permanent mounted specimens are card indexed and catalogued by subject and number so that they are fully available for reference. All autopsy reports are made in duplicate [with their accompanying history. One of these copies is filed with the Registrar, while the other is kept in the files of the department. The tumor and specimens are indexed in a similar manner, though no duplicates are made, excepting the report sent to the ward. This latter work has been done by myself and assistant, taking up a great deal of time that could be applied to more advantage on pathological research work.

In closing, I wish to commend the assistance given by Dr. M. Couret, the Assistant Pathologist, and also the work of the Resident Students detailed to the department during the year.

Respectfully,

O. L. POTHIER, M. D.,
PATHOLOGIST.

Report of Directress.

CHARITY HOSPITAL,
STATE OF LOUISIANA,

NEW ORLEANS, December 11, 1905.

To the Members of the Medical Committee, Board of Administrators:

Gentlemen—In review of the year that has passed, in the Training School's work and accomplishment, I herewith present the statistical showing that the prevalence of yellow fever in our midst has been made less notable than the previous year.

This unfortunate occurrence naturally had a retarding effect upon applications, and, too, upon the advisability of the acceptance of non-immunes.

During the year, we sent out to applicants 300 application forms; of this number fifty-two were received. The probationers released during the year numbered twenty-three, those of the Junior Class, seven, and of the Senior Class, four.

It is with great regret that I must record the death of two of our charge, Miss Bessie Strickland, on April 28th, and Miss Cliftonia Childress, on July 28th of the present year.

The pupils recommended to the Faculty as deserving the test of graduation number twenty-five, including one Sister of Charity, and have received their approval.

For 1906 the Senior Class will comprise eighteen, the Junior Class, twenty-five, with many to come, as the opening of quarantine regulations and the mail tidings confirm us in this belief. The Faculty of Lecturers have been most painstaking and patient in their instructions and I feel deeply grateful for their interest. I desire to thank our kind House Surgeon, Dr. J. M. Batchelor, and his able assistants, Drs. J. A. Danna and S. W.

Stafford, for their kindness and willing aid. In conclusion, I beg to express my grateful appreciation to your committee for such discretion as has privileged this service to an all-wise educational and humanitarian good.

Respectfully submitted,

SISTER AGNES,
DIRECTRESS.

Report of the Chairman of the Faculty.

CHARITY HOSPITAL,
STATE OF LOUISIANA.

NEW ORLEANS, December 12, 1905.

To the Members of the Board of Administrators:

Gentlemen—This is the twelfth anniversary of the Charity Hospital Training School for Female Nurses, the past session being, in many respects, the most successful since its founding. I am much gratified to inform you that we graduate to-day the largest class we have ever given diplomas. However, the full complement of Nurses has not been reached. Our intentions in the past term were to have increased the number of Nurses to the full capacity of the Nurses' Home, the necessity for such an increase being fully recognized by the Directress and myself, but owing to circumstances over which we had no control, and which forbade entrance of non-immunes into this city, our intentions were not fulfilled. For this reason, the class as now constituted for the coming year is not so large as that of the past year, but this condition will be rapidly remedied. During the past session it was our misfortune to lose two of our pupils, Nurses through fatal illness, a circumstance which we deeply regret. The School, at present, is in a healthy condition, both in its moral and in its physical health, and the outlook is perfectly satisfactory. I have the honor to present to you for graduation, and to recommend bestowal of diplomas upon twenty-five Nurses, including one Sister of Charity. In presenting these ladies to receive the official diploma from you, I wish to say, they have all passed the examinations successfully, and have served the required length of time in the wards of this

institution, and are, therefore, deserving of the diplomas about to be conferred upon them. I desire to express my appreciation of the valuable services rendered the School by the gentlemen composing the Faculty of Lecturers. To them we feel much indebtedness for their services have been promptly and willingly given. The administration of the School by our benevolent Directress, Sister Agnes, and the Superintendent of Nurses, Sister Dolores, has been directed entirely by the wish to serve, safeguard and protect its interests.

Respectfully submitted,

J. M. BATCHELOR,

CHAIRMAN.
